

Atomy Alaska E-Omega 3 Fish Oil

The **Atomy** Alaska E-Omega 3 is a health functional supplement that helps to improve neutral blood lipid and blood circulation. It provides a convenient supply of Omega 3, which is an essential fatty acid that is necessary for our bodies. The Omega 3 is produced from **fish** which is extracted in Alaska, USA. The fish is then quickly processed with oil and stored with natural antioxidants before being refined in Ohio, USA.

Because of modern-day lifestyles and meat-centered consumption habits, we need Omega 3 to prevent blood clots. **Since Omega 3 is not naturally produced by our bodies, we would have to consume it from an external source.**

Atomy Alaska E-Omega 3 provides a healthy and convenient source of Omega 3. In addition, it contains Vitamin E and Turmeric Oil which helps to prevent oxidation.

Why do we need Omega-3?

Modern Lifestyle

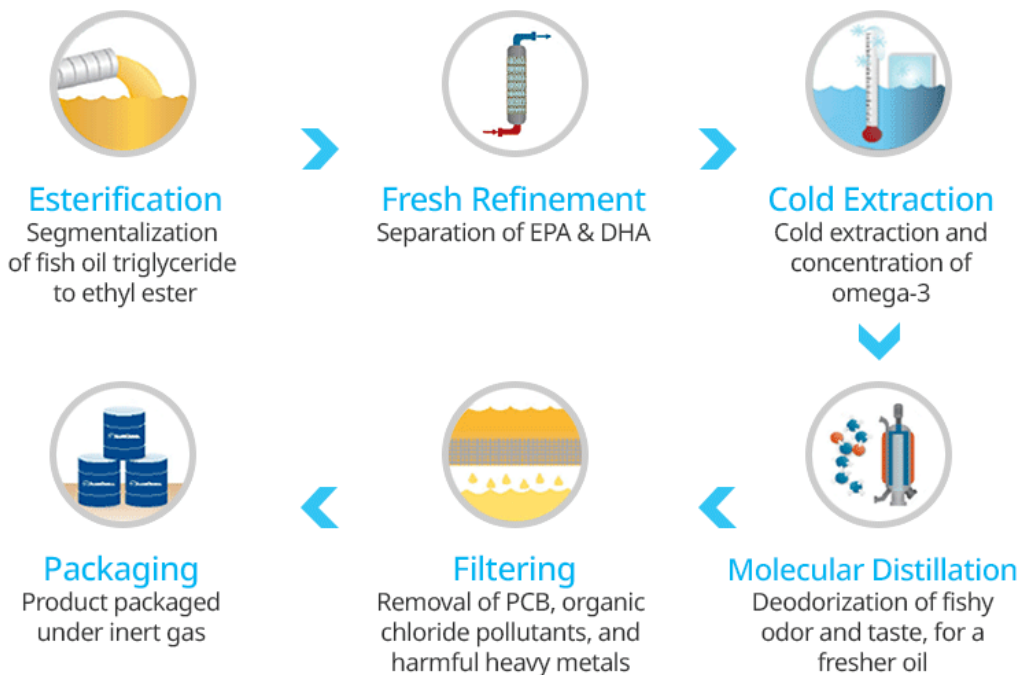

Unhealthy eating habits,
high-protein, high-fat,
stress, lack of exercise,
alcohol consumption

Aging

Changes in blood
vessels with aging

- EPA & DHA helps support a healthy heart and may reduce the risk of coronary heart disease.†
- DHA and EPA are often synthesized from α -linolenic acid within the body, but the conversion into DHA and EPA is only 10~15% for adults and 3~6% for children.
⇒ Unsaturated fatty acid must be consumed through an external source

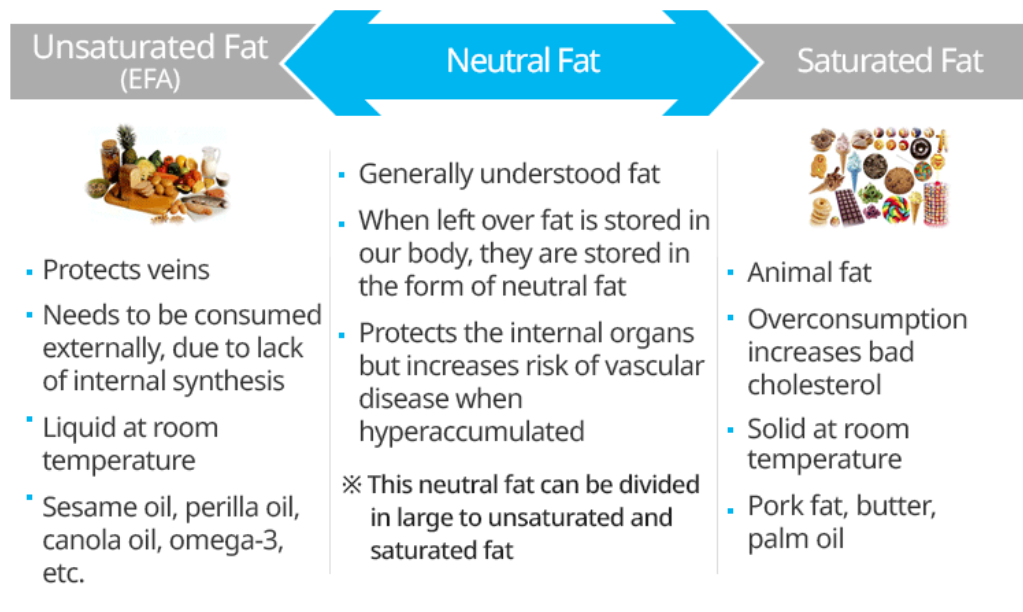

Recommended for the following people

- If you want to improve neutral lipid, a cause for blood vessel damage
- If you want to maintain and improve your health, and a more vital life
- If you need to supplement unsaturated fat
- If you lack fish consumption
- Middle-aged to aged people who need circulation improvement
- Office workers who consume excessive saturated fat due to meat-centered eating and events
- Teenagers and children who eat a lot of fast food
- Teenagers and students who spend a lot of time sitting on a desk
- Busy people with worrisome vascular health

Unsaturated fat vs. Saturated fat

Omega-3 provides the essential fatty acid: unsaturated fatty acid
